

FAILOVER SOLUTIONS

Minimise business disruptions
with these failover and alternative
technology solutions.

Telkom | **Business
Connexion**

Meet the future. Today.

- ▶ **Migrating to one of our alternative technology solutions ensures that your business communications run smoothly. These are our alternative connectivity solution options:**
 - Fibre
 - LTE

- ▶ **If you're not quite ready to migrate to an alternative technology solution, you always have the option of using our failover solutions that ensure your customers can always reach you:**
 - Data Failover Solution
 - Voice Failover Solution

Fibre

I **Fibre Features:**

▶ **Availability & Reliability**

- Reliable Internet connection and higher data throughput provides improved bandwidth availability
- Decrease in service downtime as cables are not prone to theft
- Improved WAN connectivity across multiple sites

▶ **Performance**

- Increased data upload speeds with reduced latency
- Improved efficiency of data uploads to cloud environments
- Improved efficiencies in data synchronisation
- Enables efficient and speedy analysis of Big Data for quicker business decisions

▶ **Enablement of additional services**

- Efficient use of Software as a Service applications
- Enables virtual work environments
- Improved Internet quality enables high definition Video Conferencing and Collaboration
- Improved performance of voice telephony over Fibre
- Improved business collaboration and access from anywhere

Please speak to your Business Consultant to verify Fibre coverage.

LTE

LTE Features & Benefits:

- ▶ **Telkom LTE and LTE-A is SA's leading commercially available mobile broadband and is only available on Telkom's network. Imagine your whole office connected without compromising on speed or latency. LTE enables download speeds of up to 90Mbps on LTE and 150Mbps on LTE-A which enhances the performance of your applications.**

	R999	SmartBroadband Wireless 100GB	100GB Night Surfer	Unlimited WiFi
	R1599	SmartBroadband Wireless 200GB	200GB Night Surfer	Unlimited WiFi

Please note: LTE solutions are subject to infrastructure availability. Please check our coverage map to determine which of your office branches are in the LTE footprint.

| Data Failover Solution:

▶ **We are providing every Telkom*Internet* customer with a free Integrated Data Failover Service SIM card. This provides you with free mobile data every month, which can be shared with up to 5 SIMs.**

- Allows you to access your Telkom*Internet* data by using a Telkom SIM.
- Always stay connected even if your ADSL service is interrupted
- You can use this data on the go or as a failover solution if you experience a fault.
- You receive this as a free service. You simply need to request the SIM card and activation of the service.
- The always-on SIM is compatible with most routers, tablets, 3G dongles or other APN-enabled devices.
- If you renew or sign up for a 24 month contract, Telkom will ship you a free Zyxel SBG 3300 modem and Data Failover SIM card with your mobile data.

| Voice Failover Solution:

- Allows you to link your business number to other devices, which will ring when your landline can't.
- Link your number with up to 20 devices (fixed line or mobile).
- Stay contactable even when your business line is down.
- Keep your credibility – your customers will dial the same number and get charged the same rate.
- Choose and manage which numbers receive the forwarded calls.
