

## Get UC&C capabilities on our hosted platform.

In the digital landscape, businesses have changed the way they communicate both internally and to the rest of the world. In addition to basic telephony, a feature-rich, secure Unified Communications and Collaboration platform has become essential to ensure they are able to deliver on these increasingly advanced communication requirements.

Telkom HBT Plus (HBT+) accelerates your business' communications with speedy deployment, easy management, and cutting-edge communication technology at a fraction of the cost of traditional alternatives.

WHAT IS HBT+ FROM Telkom?

Simplicity

Flexibility

Reliability

Predictability

Telkom HBT+ is a hosted Unified Communications and Collaboration (UC&C) platform, powered by Centile Istra. With hosted PBX-type services that perform call management functions to IP phones, soft clients and even legacy handsets, the technology offers a seamless evolution to future fixed-mobile convergence and UC&C services.

HBT+ is a quick-to-deploy, advanced communications service that brings your business into the future.

## HOW IT WORKS

The HBT+ Centile Istra platform is a multi-tenanted, feature-rich solution offering converged PBX and UC functionality with built-in APIs and platform integrations. The platform is easy to roll out and easy to scale. Offering numerous levels of Control and management, it allows your business to focus on what matters most and extends your reach by changing the way you communicate.

- 90+ operators across the globe with hundreds of thousands of users
- Over 1 million users deployed
- Frost & Sullivan Cloud Communications Leadership Award
