

## HMS

HMS (Huawei Mobile services) is the App/Mobile service ecosystem that is developed by Huawei and runs on Android. HMS replaces GMS (Google Mobile services). HMS isn't all new, it has actually been around for years. Huawei relaunched and expanded the platform after the US ban.

There are currently 2 devices that launched in Telkom which are HMS devices, the NEW Huawei P40 lite and Y7p. These HMS devices don't come pre-installed with Google Play Store & other Google Apps such as Gmail, Google Maps etc. Instead, the HMS devices use the **AppGallery**, an alternative to the Google Play store where customers can download their much loved Apps from.

The AppGallery offers unique and localized content, exclusive vouchers as well as the best in-class app security and compatibility. [reasons to use AppGallery]

## What is a Huawei Phone with AppGallery?

Huawei phones run on an Open Source version of **Android**, with Huawei's customized **EMUI** interface. If you have used a Huawei phone before, the experience is similar. The **key difference** is Google Apps and services are **not pre-installed** and the Google play store is replaced by **Huawei AppGallery**

## How can I access regular Apps?

There are many ways to get your Apps. Huawei AppGallery (recommended). Phone Clone, website, 3<sup>rd</sup> party App stores and Findorra app found on AppGallery.

## Can I use my Apps as normal on a Huawei Phone with AppGallery?

Huawei continues to develop AppGallery to include your favorite apps and to introduce other unique experiences. The popular apps such as social media (Facebook, Instagram, Twitter, WhatsApp), navigation, banking, email, search engines & video streaming services can be used on a Huawei Phone with AppGallery.

## How secure is the AppGallery?

Huawei phones with AppGallery adopt the industry's highest to ensure security and privacy. Huawei devices are CC EAL5+ ISO/IEC 27001 CSA STAR and GDPR compliant and certified.
